

**AMENDMENTS TO THE SPECIFICATION**

**Please replace the first paragraph on page 3 with the following amended paragraph:**

The present invention aims at carrying out a cooling system for a farm machine, comprising various radiators very close one to the other, which ~~enables to solve~~ overcomes the aforesaid drawbacks.

**Please delete the second paragraph on page 3 and replace it with the following paragraph:**

~~According to the present invention, said aim is achieved firstly by a cooling system having the characteristics disclosed in the main claim.~~ The present invention provides a cooling system for a farm machine comprising a heat exchange assembly designed to receive a cooling air flow in a direction substantially perpendicular to one end surface thereof, said assembly comprising at least a first and a second radiator disposed adjacent each other so as to be passed through by said airflow wherein hinging means are associated to at least the first radiator to enable the first radiator to pivot with respect to the second radiator between a respective operating position and a respective non operating position.

**Please replace the third paragraph with the following amended paragraph:**

~~Secondly, the invention relates to a system having the further characteristics disclosed in the dependent claims.~~ Other objects and advantages of the invention will be apparent from the following description taken in conjunction with the accompanying drawings.
